

Collaboration Connector Session

Facilitator: Amanda Tan, MS-CC

Objective:

Explore how cyberinfrastructure can connect institutions, strengthen research capacity, and spark new collaborations across the MS-CC community.

1. Go to the Public Drive:
<https://bit.ly/tuskegee-public-drive>
2. Create a Google Doc for each table. Designate a note taker.
3. Answer the questions on the next slide
 - Use these questions to identify where collaboration and CI can make the greatest difference

Questions: (<https://bit.ly/tuskegee-public-drive>)

- How can cyberinfrastructure expand or enhance what we teach, research, or discover on our campuses?
- What specific tools, platforms, or resources would most empower faculty or students to use CI effectively?
- What institutional actions or policies are needed to integrate CI into strategic priorities and long-term planning?
- Who needs to be involved - within and beyond your campus - to make CI adoption and collaboration successful?
- What infrastructure, expertise, or external partnerships are currently missing, and how might we address those gaps?
- How can CI initiatives be sustainably funded or supported over time to ensure continued growth and impact?
- How can we ensure equitable student access to CI tools and translate these efforts into meaningful community impact?
